

The ocean covers more than 70 percent of the Earth's surface and plays a vital role in supporting life on our planet. It regulates climate, produces oxygen, and provides a habitat for millions of marine species. Understanding the ocean is essential for protecting the Earth's natural balance.

NATURE NEVER RUSHES,
YET EVERYTHING IS ACCOMPLISHED

The
Waves
swept over
the
Coast

BUT THE SHORE REMAINS,
STRONG, STEADY, TIMELESS.
